

Technology Possibilities From Home

Ms. Friedman misses seeing all of your smiling faces! 😊

(jfriedman@lizajackson.org)

Minecraft Free Offers in Minecraft Marketplace Available Until 6/30/20

For those students who enjoy Minecraft on their digital/gaming devices, the company has now launched many free educational activities available to users until June 30, 2020. These activities can be downloaded for free from the **Minecraft Marketplace** and can be found under a new educational category.

Some of the activities are:

- International Space Station
- Marine Biology Role Play
- Washington D.C.
- Bees!
- Mt. Olympus
- Fun with Fractals

Coding Practice

Ms. Friedman's students in grades 2-8 already have accounts created in www.tynker.com (school purchased licenses).

- All of Friedman's M.S. Technology students from the 2019-2020 school year can still access these through their Google accounts to practice block coding, Python, and JavaScript.
- Liza students in grades 2-5 who might like to access their Tynker accounts can have their parents email Ms. Friedman for their log-in information (be sure to give the student name in email).
- If any other LJPS M.S. students would like access to the Tynker coding content, please email Ms. Friedman as some additional accounts are still available.

OR

- Tynker offers access to some content with a free account.

Any student could also practice block coding through the FREE website www.code.org.

Other FREE Online Educational Resources

www.khanacademy.com (math, science & engineering, computing, etc...)

www.sheppardsoftware.com (math, geography, language arts, science. etc...)

www.mathplayground.com (math grades 1-6)

<https://www.prodigygame.com/> (math)

- **many LJPS students already have accounts through their math teachers**

www.internet4classrooms.com (language arts, math, social studies)

- **Click on “Grade Level Help” and choose from Skill Builder options under the proper grade level - provides links to other websites by topic within subject**

www.math-tests.com (math tests for K-8, plus Algebra & Geometry)

<https://www.vocabtest.com/> (vocab activities for grades 6-12)

www.typingtest.com (free typing practice)

<https://www.bbc.co.uk/bitesize/topics/zf2f9j6/articles/z3c6tfr> (free typing practice)

- **Also called “Dance Mat Typing”**
